Guide for Universal Portal Wealth Demo App

This guide provides an overview of key features to help you navigate and utilize the demo tool efficiently. Note that the demo is designed to highlight a branded portal experience integrated with Box ICM. In addition, functions such as a workflow for acceptance of T&C's, create checklists and tasks, in app messaging have been added to demonstrate enhanced collaboration.

Key points:

- **Demo**: This is a demo tool. Not all Universal Portal or Box ICM features have been enabled for the demo.
- **Custom Pages / Workflow:** Portals are customizable. Should a customer like to see customized screens or specific workflow, please contact info@mstrategygroup.com to review demo requirements and execution.
- **Enhancements:** New features will be added to the demo periodically. As a result, should UI change and a feature missing, please contact: info@mstrategygroup.com.

Home Page

At the Universal Portal Wealth home page, enter the credentials provided after registering at at www.mstrategygoup.com/contact. Credentials will be required for access.

Note: Two sets of credentials will be provided. The first is to log in as a Admin, which enables you to modify the demo app and reset after a demo. The second is to log in as a End User. Using the End User login is optional, however, available in the event you would like to demonstrate in app messaging or task assignment and resolution.

Log In

Before logging into the portal, please note that the home page can be fully customized to reflect your customers brand and welcome content. You can further demonstrate this after log in, by navigating to the blue circle in the header, clicking on tools, then clicking button to customize home page.

After Admin or User login, you will see a Terms and Conditions form that will need to be accepted to continue. This is a workflow example to highlight to prospects or customers. The Terms and Conditions form will only be displayed once per demo. Admins must reset the demo for the Terms &Conditions workflow to be available for a new demo.

Dashboard Overview

The dashboard serves as the central hub, displaying a summary of essential information, tasks, messages, collaborators. It can provide a real-time snapshot of your activities, allowing for quick access to critical updates. Key components include:

- **Summary Section**: A quick view of graphical data which illustrates links or integration to other third party sources. In this demo you will see graphical financial market data and top story news.
- **Tasks**: Displays outstanding and upcoming assignments, ensuring you never miss a deadline. A few tasks are preset and you can add a new task. Tasks have three types; General, Signature, upload.
- **Messaging**: Enables communication with team members via direct or group messages and notifications, keeping collaboration seamless.
- **Collaborator**: Enables communication with a designated collaborator or advisor via direct messages and notifications, keeping collaboration seamless.
- **Configuration**: Dashboards be configured via Tools and selecting widgets to be on or off.

Shared Document Page

The Shared Document Page facilitates collaboration by allowing users to work on files together. This page enables users to:

- **Preview, Upload and Download Documents**: Easily manage file sharing and ensure all team members have access to the latest versions.
- **Edit and Share**: Modify documents and share them with designated users for seamless teamwork.
- **Delete Documents**: Remove outdated or unnecessary files to maintain a clutter-free workspace.
- **Messaging**: Communicate directly with your advisor or collaborator with direct messages ensuring collaboration seamless.
- **Configuration**: Shared Document page can be configured via Tools and selecting widgets to be on or off.

eSignature Page

This page lists all documents that require signatures, ensuring that important paperwork is completed in a timely manner. Users can:

- **View Pending Signatures**: Quickly access documents that need action and filter by urgency or due date.
- **Sign Documents**: Provide electronic signatures directly within the portal using built-in e-signature functionality.
- **Track Signature Status**: Monitor which documents have been signed, which are still pending, and who has yet to complete their part.
- **Send Reminders**: Notify team members of pending signature requests to avoid delays.

Loans Page

Users can submit new loan requests from this page, streamlining the application process. Features include:

- **Form Submission**: Enter necessary loan details and upload supporting documents for quick processing.
- **Application Tracking**: Monitor the status of submitted requests in real-time, receiving updates at key stages.
- **Approval Workflow**: Receive notifications on approvals and next steps, ensuring transparency and efficiency.
- **Document Attachment**: Upload required financial and identification documents directly within the request form.
- **Loan History**: Access past loan applications, approvals, and related documentation for reference.
- **New Loan:** Use to demonstrate ability to use forms to collect data from the user. Data can be routed to third party systems pending workflow and process requirements.

Trading Page

The Trading Page provides customization and management options, giving admin to show an example of a new page being added to the portal. Admin users, can via Tools execute the following.

- **Modify Trading Page**: Adjust layout, add text, links, widgets for a personalized experience.
- Add / Delete New Pages: Via Tools add new Page, delete Trading Page, turn widgets off and on.

Tools Page

The Tools Page provides customization and management options, giving users control over their experience within the portal. Users can:

- **Modify Homepage**: Adjust layout, add text, links to other pages, websites, configure footer links for a personalized experience.
- **Branding**: Add company logo, add header, change color of header links, portal button colors, add a image.
- **Manage Dashboard & Shared Document Widgets**: Add, remove, or rearrange widgets to streamline access to essential features.
- **Create New Portal Page**: Modify Trading Page, delete Trading Page, add new page. Add text, links to other websites and add / remove widgets.
- **Create new Check Lists & Tasks:** Create a Check Lists and Tasks.
- **Add Users**: Invite new users, assign roles, and manage permissions to control access levels.
- **Identify Management**: Options to select integration to various Identity Management Tools are available, however, not released with the demo.
- **Reports**: Sample report provided to highlight MAU and API detail performance and document history. Custom reports are available pending use case and requirements.
- **Integrate Third-Party Tools**: Currently not released with the demo tool.

Advisor Page

The Advisor page is meant to illustrate a page which be customized for with key elements such as:

- **Client List**: Search clients and list.
- **Tasks:** Create new tasks for clients.
- **Activity:** Detailed activity reports can be added to the page to provide a quick view on all client activity.

Reset Demo: Red Button to reset demo to original state.
